Profile

I'm passionate about full-stack development and am currently diving deep into the JavaScript world, especially ReactJS. My background includes working with C#, .NET, CSS, and JavaScript. I'm always eager to learn new things and adapt quickly, which I think adds a unique perspective to my work. I'm excited about keeping up with the latest tech trends and I'm ready to make a meaningful impact in innovative and dynamic tech environments.

Employment History

CS engineering team, Konan Technology, Seoul

MARCH 2021 – JULY 2021

- Collaborated on search engine production, adapting and integrating our system with client databases.
- Troubleshooting for client issues, ensuring efficient resolution and client satisfaction.
- Assisted with client frontend development, utilizing JQuery to enhance user interfaces.

Fullstack developer, Monthio Aps, Copenhagen

APRIL 2022 – NOVEMBER 2023

- Contributed to the organization's private UI library, enhancing and expanding frontend components for broader use across projects.
- Developed a new PDF generation feature by adapting C# Razor templates, streamlining document processing and presentation.
- Maintained and improved product dashboard and admin pages, ensuring high usability and efficient management interfaces.
- Managed and updated the C# .NET backend codebase, ensuring robust performance and reliability of backend services.
