Profile

I'm a Fullstack Developer eager to expand my skills across all areas of software development. My experience includes a mix of frontend and backend work, and I'm always keen to dive into new technologies and solve problems. I'm committed to learning and adapting quickly in the ever-evolving tech industry

Employment History

CS engineering team, Konan Technology, Seoul
MARCH 2021 — JULY 2021

I worked at Konan Technology as a Technical Support Engineer for 4 months

A lot of my time was spent fixing search engine indexing problems with client databases, which helped make everything run smoother. Plus, I got to work a bit with JQuery, tweaking the frontend to make it look and work nicer.

Fullstack developer, Monthio Aps, Copenhagen
APRIL 2022 — PRESENT

I worked as a Fullstack Developer at Monthio ApS for 1 year and 8 months, primarily focusing on frontend development with ReactJS.

On the ReactJS side, I have experience with StyledComponents and Redux. While I have a solid foundation in frontend technologies,

I'm also familiar with C# .NET for backend development, including skills in nUnit and Entity Framework (EF).

Education

BA in engineering, Seoul digital univ, Seoul
GPA 3.92 / 4.5

Courses

Codestates, Blockchain Bootcamp
SEPTEMBER 2021 — DECEMBER 2021
